

Florida Marine Businesses

209 companies · 39 with a phone number · 9 with an email · 71 with a website

About this list. Compiled from OpenStreetMap, an open licensed business dataset. It covers the whole state, but it is not a complete register of every marine business in Florida — it contains what has been mapped, which is strong on locations and thin on contact details. **78 of the 209 entries carry a phone, email or website; the remaining 131 are a name and a location only** and are listed after the contactable ones in each section. Phone numbers have been checked against the North American dialling rules; anything that could not be a working number has been left blank rather than printed. A dash means the detail is not published in this source, not that it does not exist.

Boat sales (46)
